Caetano Gimenez

Aerospace Engineering Student | CFD · CAD · Wind Tunnel Testing | Native French

Buenos Aires, Argentina · +54 911 6441 0905 · caetanogimenez@gmail.com · [LinkedIn URL] · [GitHub / Portfolio URL]

PROFESSIONAL SUMMARY

Aerospace Engineering student at UTN (75% completed, expected graduation [YEAR]) with 3 years of hands-on laboratory experience in wind tunnel design and testing and aeronautical engine analysis. Skilled in CFD simulation (Ansys), CAD (Solid Edge, AutoCAD) and numerical analysis (Python, MATLAB). Native French and Spanish speaker with [English: B2/C1, certified by ___]. Seeking a [TARGET ROLE, e.g. Engineering Intern in Aerodynamics / Design / MRO] at [COMPANY] to [apply CFD and test-rig experience to ___ / support ___].

CORE COMPETENCIES

Aerospace: Aerodynamics · Wind Tunnel Testing · Experimental Testing · Aircraft Engines / Propulsion · Orbital Mechanics & Mission Analysis (GMAT) · Technical Documentation
Simulation & Design: CFD (Computational Fluid Dynamics) · Numerical Simulation · 3D Modeling · Technical Drawing · Design for Manufacturing
Analysis & Tools: Python · MATLAB / Octave · Wolfram Mathematica · Data Analysis · Excel · LaTeX
Professional: Cross-functional Teamwork · Research Projects · Problem Solving · Project Coordination · Supplier & Inventory Management

PROJECTS & RESEARCH EXPERIENCE

Research Team Member, Wind Tunnel Laboratory | Universidad Tecnológica Nacional (UTN)
2021 – 2024 · Buenos Aires, Argentina

- Designed and built [component, e.g. test section / contraction / diffuser] of a [subsonic] research wind tunnel, delivered [on schedule / within X mm tolerance] over a 3-year project, by modeling parts in Solid Edge and AutoCAD and coordinating with a team of [N] students and [N] professors.
- Validated airflow behavior, achieving [X% velocity uniformity / Y% agreement with measurements], by running Ansys CFD simulations and comparing results against [test data].
- Enabled [N] repeatable test campaigns for future researchers, by documenting design, calibration and test procedures in [LaTeX / Word].

Research Team Member, Aeronautical Engines Laboratory | Universidad Tecnológica Nacional (UTN)
2023 – 2024 · Buenos Aires, Argentina

- Analyzed [N] aeronautical [piston / turbine] engines, identifying [N components / wear patterns / failure modes], by disassembling, measuring and inspecting parts against technical manuals.
- Produced [N] technical reports and teaching material used by [N] students, by compiling inspection findings and engine documentation into [format].
- Improved [teardown time / part traceability] by [X%], by [organizing tooling, labeling and cataloging components].

[Delegate / Chair / Organizer], United Nations Model (MUN) | Buenos Aires
2018 – [YEAR] · Biannual four-day event simulating the UN General Assembly and Security Council

- Negotiated and drafted [N] resolutions with [N] delegations, reaching [consensus / X votes in favor], by researching topics and building coalitions under time pressure.
- [Organized / led] a team of [N] participants across [N] editions, by assigning roles and coordinating schedules.

WORK EXPERIENCE

Administrative & Operations Staff | Restaurant Mineral
2020 – Present · Buenos Aires, Argentina · Part-time, alongside full university studies

- Managed supplier orders and inventory of [N] items, reducing [stockouts / waste] by [X%], by tracking stock in Excel and negotiating with [N] suppliers.
- Processed [N] transactions per [shift / week] at the point of sale with [zero / X%] cash discrepancies, by reconciling daily closings.
- Coordinated tasks for [N] staff members during peak service, maintaining [X-minute] average service times, by prioritizing orders and assigning stations.

EDUCATION

B.Eng. Aeronautical / Aerospace Engineering — Universidad Tecnológica Nacional (UTN), Buenos Aires · 2021 – Present

75% of coursework completed · Expected graduation [YEAR] · [GPA / Relevant courses: Aerodynamics, Propulsion, Structures, Flight Mechanics]

High School Diploma, Biology — Escuela Normal Superior en Lenguas Vivas, Buenos Aires · 2016 – 2020

English Courses — Cultural Inglesa de Buenos Aires · 2016 – 2019

TECHNICAL SKILLS

CAD & Simulation: Ansys CFD, Autodesk AutoCAD, Solid Edge, GMAT, Wolfram Mathematica

Programming: Python [NumPy, Pandas, Matplotlib], MATLAB / Octave

Other: Microsoft Office (Word, PowerPoint, Excel, Outlook), LaTeX (Overleaf)

LANGUAGES

French: Native · **Spanish:** Native · **English:** [B2/C1 – certification] (technical reading and writing)
